

XPWallet

Next Generation Mobile Wallet Solution

OVERVIEW: MOBILE WALLET

Mobile Wallet

It works like a bank account where people deposit their money and consume it when required. This can be in the form of fund transfer, mobile recharge, payments at merchant outlets, Bill/EMI payment etc.

Mobile Wallet system is regulated by Central bank of the Country and can be operated by a bank / telecom service provider / payment service provider, having license from the Central Bank.

Customer money is as secure as in a bank account.

It can be accessed only through its authorized user as needed.

This system is very fast, safe, transparent, convenient and authentic to its user as well as service provider.
